

The AI receptionist with a face.

Greets walk-ins. Answers the phone. Books appointments.
Alerts your team. 24/7, for one flat monthly price.

MARS AUTOMATED RECEPTIONIST ASSISTANT

Greets & checks in

A friendly face welcomes every visitor and gets them where they're going.

Answers the phone & books

Every call picked up, nights and weekends. Appointments go straight into your calendar.

Pings your team

A text the moment someone's waiting, so nobody stands at an empty desk.

Honest by design

- Says only what you've approved: your hours, services, and rules.
- Tells every visitor she's an AI. Never pretends to be a person.
- When she's out of her depth, she gets a human. She never guesses.

Built and installed locally

Hardware, installation, and support included. No per-minute surprises. Made by Mars Network Services, a Florida IT company that already wires the buildings she works in. You get a person to call, not a ticket queue.

For businesses where the owner is never at the desk:

Contractors & trades · Salons, spas & med-spas · Dental & chiropractic · Law, accounting & real estate

See her greet you in person.

Book a 15-minute demo, your office or ours.
